The Challenge

Historically, ABEM faced challenges in the certification and recertification processes with lengthy exams disrupting physicians' routines and feeling detached from real-world practice. In 2016, ABEM launched MyEMCert, a tech solution revolutionizing certification for Emergency Medicine physicians.

The Solution: MyEMCert

MyEMCert, powered by BenchPrep, introduces an efficient, accessible, and engaging certification process. It offers:

- Topic-specific modules for updated medical knowledge.
- Convenient and accessible open-book online modules.
- Immediate feedback with pass/fail results, correct answers, and detailed rationales.
- A user-friendly, flexible approach, eliminating the need for lengthy in-person exams.

MyEMCert's success led to:

- Eight comprehensive emergency medicine modules in 2021.
- Phasing out in-person exams by 2022.
- Introduction of two new modules in 2023, expanding assessment opportunities.
- Ongoing commitment to high standards in Emergency Medicine certification.
- Continue engagement in the new modules to maintain certification.

By adopting a similar innovative mindset, organizations can lead the charge in redefining the future of certification, just as ABEM has done with MyEMCert.

11

We saw BenchPrep as a technology partner for ABEM who understood the learning aspects of our program. Our requirements included a seamless intregration with our physician portal, maitaining our item bank for test questions, a time-limited and forward-only navigation assessment, access to resources during the test, and providing detailed answer rationales. BenchPrep emerged as the ideal partner that met and exceeded this criteria."

Michelle Miller, Associate Executive Director, System and Technology, ABEM

"The immediate feedback was awesome. Taking the rest in this format was very educational. The answer descriptions, whether I got the answer right or wrong were extremely helpful. This format is much superior to the old exam taken every 10 years which did not provide real feedback or educational value. **ABEM hit a home run with this one**."

"I certainly was surprised with the amount of information that I could bring back to practice just from looking through [modules] it."

"It overall was a really, really positive experience... I never ever thought I would say that. But I actually enjoyed going through the modules and going through the process of recertifying."
